

## **Description of Review Process**

The proposals for the articles on electronic format, are transmitted to the Scientific Secretary of the Agricultural Faculty, Reader Niculescu Mariana, Ph.D. at the address: mniculescum@yahoo.com The articles received by reviewers are evaluated according to the following criteria:

1. Precision and informative nature of the title
2. The title shall be written both in Romanian and in English
3. The relevancy of the information
4. The scientific nature of the works as well as the utility of the research
5. The originality of the article
6. The structure of the article :
  - resume and key words shall be written both in Romanian and in English
  - introduction, conclusions and discussions, the conclusions shall be written in English
7. The main stress shall be on results, interpretations, conclusions and the importance of the research at national and international level
8. The way the bibliography is written shall be done in accordance to the international standards
9. The imposed writing conditions shall be complied
10. Correct utterance, orthography and punctuation

After the evaluation process, the scientific reviewers shall complete a report in which they are to note and argue the degree of accomplishment for every criterion. If an article does not fulfill the criteria established by the Scientific Committee of the volume, this will be returned to the owner together with the reviewers' suggestions to rewrite and improve the scientific article.
