PROJECT TITLE:	
Training Center for Health Care, Prophylactic and Rehabilitation Services	
ACRONIM: HERPS Centre	
PROMOTOR:	
University of Craiova	
ORGANISATION TYPE (CODE): U	
ADDRESS: A.I. Cuza, nr.13, Craiova postal code 200 585	
TEL.: ++40/251 413041	
FAX: ++40/251/413687	
WEB ADRESS: http://www.central.ucv.ro	
AUTHORISED PERSON: Vladimirescu Ion, Rector	
TEL.: : ++40/251 413041	
FAX: ++40/251/413687	
CONTACT PERSON: Rinderu Taina	
TEL.: ++40/251/414781	
FAX: ++40/251/413687	
E-MAIL: taina_mistico@yahoo.com	
TYPE OF ACTION:	Pilot
NUMBER BENEFICIARIES:	60
TARGET GRUP:	Nurses, students in kinetotherapy, young graduates

OBJECTIVES

LEONARDO DA VINCI (a, b sau c)

a

- to offer a **well equipped center** where under and post graduated kinetotherapists, nurses *can develop good routines for the rehabilitation process by following specific standards and procedures* by working directly with patient under guiding and supervision of specialists. This will offer ***new forms of learning and developing basic skills in vocational and educational training***, (improving the quality of training process).

By helping young graduates to work and gain experience in this center *the number of kinetotherapists will increase, helping to develop European standards in Romania in prophylactic and rehabilitation areas* (improving the quantitative aspect of the training process)

- to **achieve and utilize new knowledge, equipments and technologies** that will assure an optimal use of competencies to develop and adapt the most efficient procedures with good results for the prevention and rehabilitation in various pathologies, offering *new pathways to achieve specific training*.

- to offer disabled people and other people with special needs from our region a place where they can be treated and rehabilitated with no cost at all, offering **social protection**

- to offer **new employment possibilities** by increasing the beneficiaries experience and quality of training

- to **implementate lifelong learning strategies** by elaborating a *new curricula* adapted to European standards and creating a *virtual center*

- to **create learning material (manuals, CDs)** with specific information to help *continuing vocational training* after the programme ends and also to help the *dissemination* of the project

- to help host organizations to find more about **Romanian rehabilitation potential** in balneary resorts, our intention being to **enlarge the learning process** through organizing practical stages in the surrounding balneary resorts (Herculane, Govora, Calimanesti).

PROJECT SUMMARY

Why? The project addresses to the *increased demands of society concerning prophylaxis and rehabilitation* in various fields. We have to consider that *kinetotherapist profession (the equivalent of physiotherapist/kinésithérapeut in Europe) is a new one on the labour market in Romania* and because of this, there are few places in Romania where they could develop good routines by following specific standards and procedures.

What we intend to do? We intend to develop a Training Center for Health Care, Prophylactic and Rehabilitation Services where recent graduated kinetotherapists can improve their practical knowledge, but also students or nurses can get the needed practical knowledge by working directly with patient under guiding and supervision of specialists. We have already found the location of this Center in one of the buildings of our University where we have got some medical and physiotherapy specific equipment. In this way we value the idea that **the access to learning opportunities for all relies not only on the motivation and ability of individuals to learn but also on the creation of appropriate conditions of learning in the different settings, particularly in the workplace.**

The training programme will be structured on 3 levels, one for each category from the target group, and will include distance learning and practical learning by several modules runned by invited professors. The final products will consists in elaborating new modules of formation, new training approaches (working with the patient, interactive learning through open distance system), and elaboration of different materials at the end of the programme (elaborating and using of CD ROMs) that will permit to continue vocational training. Our Romanian and foreign partners will be chosen among both medical and physiotherapy professionals with high physiotherapy competencies but also competencies in multimedia services for disabled persons

PARTENERS:

- **PREFECTURE OF DOLJ COUNTRY**
- **FUKO – UNIVERSITARY FOUNDATION FOR KINETOTERAPY ORADEA**
- **UNIVERSITY OF ORADEA**
- **HOGESCHOOL WEST-VLAANDEREN VAN, BELGIUM**
- **ENTENTE UK**
- **SCUE / STUDIO DI CONSULENZA PER L'UNIONE EUROPEA, ITALIA**
- **TECHNICAL UNIVERSITY OF CRETE, GREECE**

Table 1. Outcomes of the project

Type of result	Description	Language	Media	No. of copies	When will they be available
Reports	1. Initial report for needs identification made by partners (WP1) 2. National report WP1 3. Final report WP 2 4. Final report WP 3 5. Final report WP 4 6. Final report of the project 7. National report WP	1-7. English and Romanian	1-7. Written	20 10 20 20 20 20 10	1. March 2005 2. end of June 2005 3. end of September 2005 4. end of May 2006 5. end of October 2006 6. end of November 2006 7. end of June 2006
Questionnaires	1. questionnaires for for needs identification 2. questionnaires addressed to nurses, students, young graduates, patients involved in the programme	1. English and Romanian 2. Romanian	Written	600 100	Beginning of May 2005 January 2005
Meetings	Internal meetings will be held at the end of each WP in different participant countries, followed by press conferences National meetings for Romanian partners Final conference at the end of the project	English	Presentation and discussions	Not applicable	Previous to reports
Methodology of Quality Assurance System	A guide containing the quality criteria and strategies in order to to attend European level and attend recognition for the outcomes of the project (manuals, CDs, methods of formation, curricula)	English and Romanian	Written	20	End of April 2005
The Training Centre for Health Care prophylactic and rehabilitation Services	- as regarding the infrastructure and legal frame	-	-	Not applicable	End of September 2005
Computer network	Information and communication technologies	-	-	Not applicable	End of September 2005

Initial curricula	<ul style="list-style-type: none"> ➤ modules of formation ➤ methodology ➤ evaluation system 	English and Romanian	Written	Not applicable	End of September 2005
